

Science

Established in 1977 to provide basic science and mathematics instruction to all undergraduate students of the institute, the responsibilities of The Faculty of Science at KMITL has been expanding since 1988 to offer a variety of degree programs at Bachelor's, Master's and Doctoral levels.

Our success can be measured both nationally and internationally: over the past 30+ years, more than 50,000 graduates have gone on to play significant roles in the science and technology development of the country, with a number holding senior positions in both government and the private sector. We are also proud of our international collaborations via joint degree programs and staff / student exchange programs with renowned universities worldwide, including The University of Oklahoma, USA; the University of Strathclyde (UoS), UK; Institute National des Sciences Appliquées (INSA) Toulouse, France; Harbin Institute of Technology (HIT), China; Iwate University, Japan; Japan Advanced Institute of Science and Technology (JAIST) and National Chengkung University of Taiwan (NCKU), Taiwan.

Our stated objective is to achieve Excellence in Industrial-oriented Applied Science for Sustainable Development by 2024, and we are well on course to reach our goal.
