

Agricultural Technology

Originally founded in 1966 in Nakorn Pathom province, the Faculty of Agricultural Technology was relocated to KMITL in 1979, and now has approximately 2,500 undergraduate and 200 post-grad students. Our international reputation is recognized, with a number of students from Germany, Japan, Vietnam, Cambodia, Philippines, China and Laos and we are fast moving towards our vision of becoming the top ranking Faculty of Agricultural Technology across South East Asia.

The Faculty covers a number of disciplines including horticulture agronomy, soil science, entomology, pest management, plant pathology, landscaping, animal science, fisheries science, agricultural extension and agricultural development.

Students learn and practice agricultural science and are encourage to use their knowledge to create innovation and sustainability in agriculture. Over 25,000 have gone on to enjoy success in government and in the aqua-cultural, pharmaceutical and plant production industries.
