

Education Innovation Research

The College of Educational Innovation Research (CEIR) was established in order to develop innovation in education and to lay a foundation in administration, teaching and learning management for the development of human resources and work forces, in line with the nation's strategic development policies.

We emphasize the development of courses and degrees that integrate education ideas and technology in line with the specific needs of the industrial and private sectors, in order to ultimately boost global economy. As an

example, in 2018 CEIR launched a new Ph.D. program in Innovation and Industrial Management in cooperation with leading innovation and industrial sectors both in Thailand and abroad.

Students are empowered with state of the art knowledge and skills that are essential for professional development in current society. All our CEIR staff are experts in the fields of education and industrial management.
